In collaboration with:

# COATING PAN OPERATOR

## CERTIFICATION

**NOVEMBER 16-18, 2021 | 8:30 AM – 4:30 PM EST  
@FEDERAL EQUIPMENT COMPANY | CLEVELAND, OH**

**CLASSROOM/LABORATORY CERTIFICATION COURSE WITH HANDS-ON TRAINING**

### OVERVIEW

This accredited training will provide you with the theory, currently accepted practices, and machine parameters to become a fully qualified coating pan operator. Certified graduates of this course will be able to quickly assume the duties of a coating pan operator in the pharmaceutical or nutritional supplement industries after a minimum introduction and initiation to the individual coating department and the unique SOP's and individual company policies that govern the manufacturing area.

### HANDS-ON TRAINING

Includes solution preparation, gun clean up and assembly, assembly of the coating pan, placebo tablet coating, application of the AQL quality attributes test to finished tablets and basic equipment clean up. Equipment to be utilized: 36" fully perforated coating pan with multiple gun coating system.

### WHO WILL BENEFIT

This certification will be valuable to all individuals seeking employment, currently working within, or supervising a tablet coating department. In addition, operator certification is valuable for R & D technicians, pilot plant personnel and validation engineers seeking a comprehensive understanding of what is required to aqueous film coat a quality pharmaceutical or nutritional supplement tablet.
